

## Roadmap for Education

### Foundation Strategies

If we, as a foundation, support best practices and innovative educational programming through highly effective not-for-profit organizations, (e.g. literacy, STEM programs, arts education, mentoring, scholarships, college readiness and persistence programs) at all levels then...

### Immediate Outcomes

...these organizations are better able to support and empower students, teachers, schools, and parents in underserved communities to enrich and strengthen the educational experience so that. . .

### Intermediate Outcomes

...communities are better able to prepare youth academically, socially and financially for college and create greater understanding of the benefits of higher education; More youth will graduate from high school and enroll in college, and youth will gain the confidence, skills and funding to succeed in college.

### Intended Impact

Ultimately, more disadvantaged youth in the Chicago-area will graduate from college, which will help break the cycle of poverty.
